Disruptive Technologies & the Insurance Industry
Embracing Change

2016 will no doubt see a continuation of rapid technological change. Disruptive technologies such as Uber will continue to dominate the headlines while transformational technologies such as driverless cars and drones continue to percolate in the background. Join us for a discussion of the impact these technologies will have on the insurance industry. From distribution to underwriting to claims, the insurance industry needs to be on the forefront of change or risk being left behind.

Diane Rodgers is General Counsel for AIG Canada. She is actively involved in the development of innovative products across the property and casualty spectrum, including products aimed at serving disruptive technology companies. Before joining AIG, Diane was the Managing Attorney leading the International Legal department for a US niche insurer. In that role, Diane managed legal affairs in 15 countries world wide with a team of 15 lawyers and paralegals. Diane’s background includes experience with one of Canada’s largest banks and law firms. Diane holds an LLB and LLM from Osgoode Hall Law School.
